

14Question

04 January 2026 01:52 PM

14. Build a workbook for managing and analyzing sales data of a small store

a) Create a workbook with sheets:

- i. Store_Sales
- ii. Summary
- iii. Charts

b) Import a CSV sales file (or create a sample table) containing:

Date, Product, Category, Quantity, Price, Total Sales

c) Use Sort (A→Z, Z→A) to organize products by name and category.

d) Apply Filter to view only “Electronics” category.

e) Use SUMIF to find total sales for a selected product (e.g., “Headphones”).

f) Use LEFT, RIGHT, MID to extract:

- i. First 3 letters of the product name
- ii. Last 2 letters of the category

g) Find highest and lowest sales value using MAX / MIN.

h) Prepare a monthly sales summary in the Summary sheet using AVERAGE & SUM.

i) Create a Line Chart of month-wise total sales in the Charts sheet.

j) Apply sheet protection so data cannot be edited accidentally.

PRACTICAL 14: SALES DATA MANAGEMENT WORKBOOK

Aim:-

To build a workbook for managing and analyzing sales data of a small store using MS Excel.

Objectives:-

1. To manage sales data efficiently
2. To analyze product-wise and monthly sales
3. To use Excel formulas and functions
4. To present sales data using charts
5. To protect data from
6. accidental changes

Materials Required:-

MS Excel, Computer

Procedure:-

1. Open MS Excel and create a new workbook.
2. Rename the three sheets as Store_Sales, Summary, and Charts.
3. In Store_Sales sheet, create columns: Date, Product, Category, Quantity, Price, Total Sales.
4. Import a CSV sales file or manually enter sample sales data in the table.
5. Use Sort (A→Z or Z-A) to arrange products by Product Name and Category.
6. Apply Filter to display only records belonging to the "Electronics" category.
7. Use SUMIF function to calculate total sales of a selected product (e.g., Headphones): =SUMIF(B2:B100, "Headphones", F2: F100)

8. Use text functions to extract data:

First 3 letters of Product Name:

=LEFT(B2,3)

Last 2 letters of Category:

=RIGHT(C2,2)

Middle characters if required:

=MID(B2,2,4)

9. Use MAX and MIN functions to find highest and lowest Total Sales values.
10. In the Summary sheet, prepare a monthly sales summary using SUM and AVERAGE functions.
11. In Charts sheet, create a Line Chart showing month-wise total sales.
12. Apply Sheet Protection to prevent accidental editing of data.
