

15Question

04 January 2026 02:24 PM

15. Create a complete personal financial planner workbook

a) Create and rename sheets as:

- i. Expenses
- ii. Budget
- iii. Charts

b) Enter at least 20 rows of expense data:

Date, Category, Expense Detail, Amount, Payment Method

c) Use Data Validation dropdown to create category list (Food, Travel, Fees, Shopping, Other).

d) Use Remove Duplicates on the Category column if repeated incorrectly.

e) Use SUMIF to calculate total spending for each category.

f) In the Budget sheet, create monthly budget and compare with actual expenses using:

Difference = Budget – Actual (formula required).

g) Highlight expenses above ₹2000 using Conditional Formatting.

h) Create:

- i. A Pie Chart showing category-wise spending
- ii. A Bar Chart comparing Budget vs Actual
- iii. Use Flash Fill to separate date into Day / Month / Year and explain it
- iv. Save worksheet in Page Layout view and adjust print

15. Personal Financial Planner Workbook

a) Create & Rename Sheets

Create a new Excel workbook and rename sheets as:

Expenses

Budget

Charts

b) Expenses Sheet – Enter Data (20 Rows)

Headings (Row 1):-

Date | Category | Expense Detail | Amount | Payment Method

Example categories: Food, Travel, Fees, Shopping, Other
Enter minimum 20 rows of expense data.

c) Data Validation – Category Dropdown

Steps:-

Select Category column (B2:B21)
Go to Data → Data Validation
Allow → List

Source:-

Copy code
Excel
Food,Travel,Fees,Shopping,Other
Click OK

✓ Creates a dropdown list.

d) Remove Duplicates (Category Column)

Steps:-

Select Category column
Go to Data → Remove Duplicates
Click OK

✓ Removes incorrect repeated entries.

e) SUMIF – Category-wise Total Spending

Example formulas (placed anywhere, e.g., bottom or Budget sheet):

Food Total

Excel

=SUMIF(Expenses!B2:B21,"Food",Expenses!D2:D21)

Travel Total

Excel

=SUMIF(Expenses!B2:B21,"Travel",Expenses!D2:D21)

(Same for Fees, Shopping, Other)

f) Budget Sheet – Monthly Budget Comparison

Headings:

Category | Budget | Actual | Difference
Actual (using SUMIF):

Excel

=SUMIF(Expenses!B:B,A2,Expenses!D:D)

Difference Formula:

Excel

=B2-C2

✓ Difference = Budget – Actual

g) Conditional Formatting – Expenses above ₹2000

Steps:-

Select Amount column (D2:D21)

Home → Conditional Formatting → Highlight Cell Rules

Greater Than → 2000

Choose Red Fill

Click OK

h) Charts & Flash Fill

i) Pie Chart – Category-wise Spending

Select Category totals

Insert → Pie Chart

Title: Category-wise Expenses

ii) Bar Chart – Budget vs Actual

Select Budget & Actual columns

Insert → Bar Chart

Title: Budget vs Actual Comparison

iii) Flash Fill – Date Separation

Assume Date is in A2

Day (F2)

Excel

=DAY(A2)

Month (G2)
Excel
=MONTH(A2)
Year (H2)

Excel
=YEAR(A2)
Flash Fill Explanation (for exam):

Flash Fill automatically detects patterns and fills data without formulas when we press Ctrl + E.

iv) Page Layout View & Print Adjustment

Steps:-

View → Page Layout

Set Orientation: Portrait/Landscape

Adjust Margins

Set Scaling → Fit Sheet on One Page

Save workbook
