Identify Phishing Attack

Aim:-

To identify phishing attempts through digital messages.

Objectives:-

- To detect cybercrime
- To recognize scam elements

Materials Required:-

- Provided phishing example

Procedure:-

Read message text:-

Carefully go through the entire message to understand its content and intent

Make note of any unusual requests or unfamiliar senders.

List cybercrime type:

Based on the suspicious elements, categorize the message as phishing, fraud, malware attempt, etc.

This helps in understanding the nature and threat level of the cybercrime

Write verification steps:-

Suggest ways to confirm authenticity, such as checking the sender's email, contacting the official source, or scanning links.

These steps help prevent falling victim to cyberattacks.
